Drawings

The drawings are objected to because Fig. 5 is not a proper view as taken at reference lines 5-5 of Fig. 4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1,5-24 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5 and 8 depend from a canceled claim and are assumed to be dependent on claim 1. Claim 14 has an ambiguous dependency. In claims 1 and 19, the front sash opening (defined by side walls between front and rear sides) is said to be smaller than the investiture. However, this is not accurate. The opening of the frame for the front sash (recited later in claim 19 and not recited in claim 1) is smaller than the investiture.

Claim Rejections - 35 USC § 103

Claims 1,5-11 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bakalar in view of Howard and further in view of Schaller et al.

See the embodiment of Figs. 10-20 in Bakalar wherein he discloses two sets of Venetian blinds suspended by and moveable along parallel tracks. See track 102. What he does not show are the walls and the mesh and the frame (inferred in claim 1). However, Howard discloses Venetian blinds having screen mesh supported in frames/walls which are further slidable. In view of this teaching, it would have been obvious to modify Bakalar whereby his blinds are in frames so as prevent swaying of the blinds during movement and mesh screen to prevent ingress of pests. The relative sizes of the sashes and the flanges to extend the size of the rear sash are viewed as merely aesthetic features since there has been given no reason as to their purpose.

The details of the frame of Howard are not shown. However, Schaller discloses a frame for a Venetian blind that provides channels which define walls (base of the channel) and frames (sides of the channel). It would have been obvious to provide the frame of Bakalar and Howard with such a structure so as to contain the blind, thereby providing an opening smaller than the size of the investiture.

Art Unit: 3634

Claims 12-14 and 19-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bakalar in view of Howard and Schaller et al as applied above, and further in view of Matimura.

Matimura discloses a roller and track system that permits movement of the rollers in all directions. This includes upturned flanges and pairs of rollers as clearly seen in Figs. 5-7. It would have been obvious to replace the roller system of Bakalar with that of Matimura so as to provide a more smoothly movable panel. While Matimura teaches supporting the tracks to the bottom of a horizontal surface (header), Bakalar also teaches such as seen in Fig. 5 wherein the vertical portion of the header 12 has the brackets attached thereto.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. There are no specific arguments directed at the Bakalar and Howard references. However, since the previous indication of allowable subject matter has been rescinded, this action is not made final.
